

## Punch Standard Distance Cutter

The punching standard paper cutter is used to cut samples with a width of 15mm to meet the sample preparation for the paper and cardboard tensile test, folding endurance test, short-distance compression test and other items. It complies with the relevant provisions of the QB/T1671 standard. It has the advantages of high sampling size precision and easy operation. It is an ideal test aid for paper and packaging, scientific research, quality inspection and other industries and departments.

### Model

YT-CQ15

### Product Features

The width of the cut sample is fixed

### Key Technical Parameters

|                     |                         |
|---------------------|-------------------------|
| ✧ Sample Width      | 15 mm±0.1mm             |
| ✧ Sample Max Length | 250 mm                  |
| ✧ Parallelism       | ≤0.025mm                |
| ✧ Dimension         | 450(L)×110(W)×540(H) mm |
| ✧ Net Weight        | 25kg                    |
